Il programma più completo di prodotti per realizzare ed arredare il tuo ingresso
The most complete programme of products to create and furnish your entrance

Con una crescita ininterrotta iniziata già nei primi anni novanta, ROYAL PAT® si è conquistata la posizione di leader per la produzione di pannelli per porte d'ingresso in alluminio, acciaio e pvc.

Entusiasmo, esperienza, tecnologia, ricerca ed una continua e scrupolosa attenzione alle esigenze dei clienti, hanno dato vita ad una industria moderna che offre la più vasta gamma di prodotti di tutti gli stili per un risultato di altissima qualità: la porta d'ingresso della vostra casa.

With the uninterrupted growth that started in the nineties, ROYAL PAT® has earned the position of leader for the production of aluminium, steel and pvc panels for entrance doors.

Enthusiasm, experience, technology, research and a continual and scrupulous attention towards the clients' needs have given life to a modern industrial life that offers the most vast range of products in all styles for a high quality result: the entrance door to your house.

PARTNER® è la nuova linea di pannelli esclusivi SICILPANNELLI realizzata in collaborazione con la Royal Pat srl, azienda leader in Italia nella produzione di pannelli per porte d'ingresso.

La ROYAL PAT® si riserva di apportare tutte le modifiche tecniche e migliorative dei prodotti, senza l'obbligo di preavviso.

È vietata la riproduzione anche parziale del presente catalogo senza espressa autorizzazione da parte della ROYAL PAT®.

PARTNER® is the new line of exclusive panels, SICILPANNELLI, it has been produced in partnership with Royal Pat srl, a leading company in Italy for the production of panels for front doors

La ROYAL PAT® reserves the right to make technical changes and improvements to the products with no advance notice.

This catalogue may not be reproduced, even in part, without explicit authorisation from ROYAL PAT®.

Caratteristiche

L'assemblaggio dell'MDF con le lastre di alluminio che formano il pannello avviene mediante l'utilizzo di speciali collanti che garantiscono un'ottima unione fra i due materiali, anche in presenza di forti escursioni termiche (-40° C+ 130° C). Tale unione permette una funzionalità ed una praticità che sono i dati certi di tutti i nostri pannelli.

Characteristics

The assembly of the MDF with the aluminium sheets to make up the panel involves the use of special cements which guarantee excellent bonding between the two materials, even in the case of wide temperature ranges (-40° C+ 130° C). This bonding ensures efficiency and practicality, which are the fundamental features of all our panels.

Per garantire la massima resistenza alle insidie degli agenti atmosferici, ed alle corrosioni, le lastre di alluminio vengono trattate prima della verniciatura con un procedimento che prevede: un trattamento di fosfocromatazione ad immersione, quindi le lastre vengono trattate da entrambi i lati.

To guarantee the maximum resistance to the attacks of bad weather and corrosion, the aluminium sheets are treated before painting in a process which involves phosphochromatising by immersion so that the sheets are treated on both sides.
